Ordering Information

How to Place an Order

Our instruments may be ordered through an authorized dental distributor. Your dental distributor will take your order and ship the product to you. If you have questions prior to placing an order or would like to place an order for HuFriedyGroup products, please contact our Customer Care Team via the contact information on the following page. We will need to know your distributor preference because your order will automatically be shipped and billed through your dental distributor. If you do not have a dental distributor, an authorized distributor listing is available from our website at **HuFriedyGroup.com/wheretobuy/distributors**

Customer Care Department

We are proud of our highly trained, qualified and professional Customer Care Team. They are dedicated to helping you meet your needs. Feel free to call a HuFriedyGroup Customer Care Representative when special assistance is needed.

Special Order Instruments

We manufacture an extensive selection of instruments. We welcome the opportunity to manufacture instruments on a special order basis. Instruments that are currently available but are desired in an alternative tip/handle selection or are a special school pattern, are considered special order instruments. Price quotations are available upon request. Submit all special order requests to HuFriedyGroup Customer Care at **care@hu-friedy.com**. All special order instruments are the property of Hu-Friedy.

Custom Design Instruments (Hu-Friedy Brand Only)

We are a leader in the development, manufacturing and distribution of quality dental instruments as well as products and services related to their use, maintenance and management. We will be pleased to review and provide a quote for custom designed instruments if we can meet your needs. Minimums may be required. All custom designs remain the property of HuFriedyGroup. To receive a quotation for a custom instrument, please provide: 1) An actual sample and/or a detailed written description that includes all dimensions and measurements. For example: bend angle(s), point width(s), length(s), radius(radii), bevel angle(s), handle design, special material requirements, etc. 2) Provide the name and phone number of your dental distributor. This information will be used to prepare a price quotation. Pre-payment of an initial prototype fee and written approval of the price quotation is required to begin production. All prototype set-up fees are non-refundable. Subsequent orders (more than two years) after the initial order are subject to additional prototyping charges. All custom designs are the property of HuFriedyGroup

HuFriedyGroup Guarantee

Any HuFriedyGroup product that fails as a result of material defect or poor workmanship will be repaired or replaced at no charge. We cannot be responsible for the performance or replacement of

any HuFriedyGroup instrument that has been tampered with, modified, retipped, or refitted in any manner. See **HuFriedyGroup.com/services/warranties** full product warranty details.

Returns, Repair & Reconditioning

Complete service for HuFriedyGroup instruments and IMS™ Cassettes is available in our Chicago facility. Please contact us with any questions or concerns regarding HuFriedyGroup instruments. Call 1-888-TEC-TECH (1-888-832-8324) and you will automatically be connected with the HuFriedyGroup Technical Service Representative who covers your area. All returns should be sent to: HuFriedyGroup Technical Service 3232 N. Rockwell St., Chicago, IL 60618.

For the repair and service of HuFriedyGroup EMS products call 1-888-456-7895 or email **hf-ems@hu-friedy.com**.

No Retipping

We do not repoint or retip instruments. To do so would compromise the structural integrity of the instrument and our quality standards. In addition, there is a high degree of potential risk to all parties inherent in such a service. Therefore, retipping or repointing instruments will void the warranty HuFriedyGroup offers.

Probes

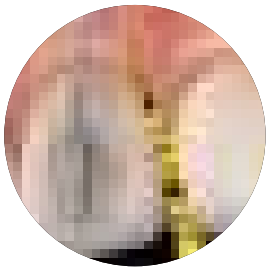

Qulix Probes are coded with accurate, smooth black markings, which will not chip, flake, or fade. Colorvue™ Probes feature a vivid markings for enhanced contrast intraorally.

Learn more about our Probes.

Colorvue™ Probes

Colorvue probes feature a vivid yellow or white tip with black markings for enhanced contrast to intraoral structures in both natural and implant dentitions. Optimal flexibility and a rounded tip provide greater patient comfort and acceptability. The probe tips are made with resin, which makes them safe for use with implants and feature a twist-on design for easy replacement of worn tips.

Colorvue is a safe and effective choice for assessing peri-implant health.[2]

Procedural Kits

Our procedural kits are a compilation of clinicians' most popular procedural set-ups designed for ease of ordering.

Aerosol Mitigation

Many studies have shown that the same clinical outcomes are achieved with hand scaling as with ultrasonics, allowing you to provide enhanced patient care while mitigating aerosol risks. If you are prioritizing hand scaling take advantage of our Aerosol Mitigation Kit, available with or without the HVESolo™ Disposable Evacuation Tips.

EverEdge™ 2.0 Technology

As an educator, I always recommend EverEdge™ Instruments to my dental hygiene students. When well maintained, they can be sharpened so quickly and easily. A real advantage of the fine sharp cutting edge is less hand fatigue for the hygienist and better comfort for the patient, so both the clinician and patient can feel the benefits of EverEdge.

Jill Nield Gehrig, RDH, MA
Dean Emeritus, Division of Allied Health

The EverEdge™ 2.0 Blades sharpened very easily and remained sharp with each additional use.

Judith Reid, M.Ed, RDH

Finely-Honed Finish

EverEdge™ scalers are sharp...EverEdge™ 2.0 scalers are even sharper. Using an enhanced finishing process, Our professional artisans are creating edges that are scientifically measured to be over 60% sharper than the next closest competitor. Less force means easier, more comfortable scaling for the clinician and patient.

Proprietary Process

Our proprietary processing ensures that the superior edge retention and wear characteristics of EverEdge™ Technology will last the entire life of the instrument. Since EverEdge™ is not a superficial coating, the instruments can be resharpened like any other scaler.

Diamond Knurl

The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge™ handle was also designed to be the optimal weight for reduced hand fatigue while the Harmony™ Ergonomic Handle designed with TrueFit™ Technology is scientifically proven to be truly ergonomic.

Stays Sharper Even Longer

EverEdge™ 2.0 uses an optimized heat control process in order to maintain the hard, sharp edge. This heat control, plus several manufacturing intricacies in our proprietary process, provide the durability needed for effective procedures and continued use.

Comfort Zone

In the transition zone between the handle and working end the lightly textured silicone grips provide for a secure and comfortable grasp.

For more information on EverEdge™ 2.0 Technology, visit HuFriedyGroup.com/EE2.

Handle Options

We offer a wide variety of handle options for our hand scaling instruments giving clinicians a choice between styles, materials, and textures. Take a look below at our EverEdge™ 2.0 Scaler and Curette Handles as well as our handle options for our Immunity Steel™ Scalers and Curettes.

Gracey Curettes

Gracey curettes are area-specific curettes with blades having a single cutting edge, offset at 70° to the shank, to provide a perfect working angulation to the tooth surface.

Learn more about our Gracey Curettes.

Standard Gracey Curettes

Standard Gracey Curettes allow for deep scaling, root planing and periodontal debridement. Gracey Rigid curettes have thicker, stronger and less flexible shanks than Standard Graceys to allow for removal of moderate to heavy calculus. Gracey Extra Rigid Curettes are ideal for tenacious calculus removal. Standard, Rigid and Extra Rigid Gracey Curettes all have identical blade dimensions.

The Clayton Gracey Story

In the late 1940s, an innovative dentist from the University of Michigan had a vision. Clayton Gracey wanted to "give every dentist the possibility to treat even the deepest and least accessible periodontal pockets simply and without traumatic stretching of the gingiva."

Dr. Gracey brought his idea to Hugo Friedman, the founder of Hu-Friedy, who supported his concept. Together they developed a series of 14 single-ended area-specific instruments for the successful removal of deposits from root surfaces.

Dr. Gracey's designs laid the groundwork for the new instruments of today. Currently, Gracey curettes are available as double-ended instruments with multiple handle choices.

The Gracey curettes have come a long way since the original design. Hu-Friedy currently manufactures a variety of styles and patterns, such as After Five® curettes with a longer terminal shank and thinned blade, Mini Five® curettes with After Five® features and a shorter blade, and the 15/16 and 17/18 patterns. An optional Rigid shank is available on all of the Gracey designs.

Hu-Friedy is continually looking for new ways to improve our existing products. Our success is dedicated to the pioneers in dentistry, including Dr. Clayton Gracey, who helped to make a vision become not only a reality, but also a part of every dental office today.

Pattison Gracey Lite Curettes

The Anna Pattison Curettes are modified from the original Gracey Curettes. These new instruments have shorter, thinner, smaller blades honed at a 60° angle with a modified rigid shank specially designed to allow easier access and insertion under tight tissue.

Vision Curvettes

Vision Curvettes are modified Gracey Curettes that feature 5mm and 10mm shank markings to help visually assess pocket depth; and a blade identification mark (+) on the handle for easy determination of the cutting edge. The short, curved blades are ideal for root surfaces and furcations.

After Five® Gracey Curettes

Designed to adapt to a specific area or tooth surface.

- **Longer terminal shank allows better access to deep pockets and areas with recession.**
- **Blade is 10% thinner than standard Gracey curette to allow for less tissue distention when accessing deeper pockets.**

Terminal shank redesigned to be 3 mm longer than a standard Gracey curette.

Universal Curettes

Universal Curettes have two parallel cutting edges that meet at a rounded toe. The back surface is rounded giving a semi-circular cross section. Due to this rounded back surface, curettes are ideal for the removal of subgingival debris.

Learn more about our Universal Curettes.

Langer Curettes

The Langer Curette design combines the benefits of a universal curette blade with two cutting edges and the shank designs of area specific curettes. The Langer Curettes were originally designed to be used in a set of three (1/2, 3/4, 5/6), to adapt to most tooth surfaces, and to be suitable for scaling as well as periodontal surgery.

Best in Practice Fact

The Langer curette takes a "best of both worlds" approach to instrument design. The curette pairs a universal blade — featuring two parallel edges and a 90-degree angle between the terminal shank and blade face — with the shank design of area-specific Gracey curettes. The result is an instrument that adapts well and is efficient.

ResinEight™ Colors with EverEdge 2.0 Technology

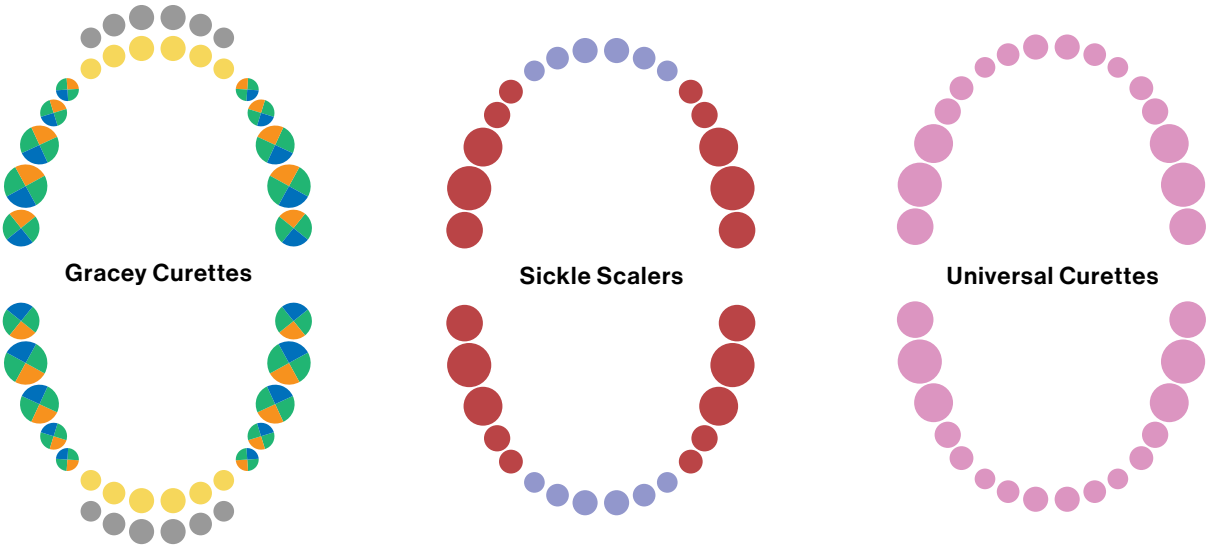

Our ResinEight™ Colors Scalers and Curettes are ergonomic, lightweight and offer a color-coding system based on specific areas of the mouth. Plus, each instrument features our proprietary EverEdge™ 2.0 Technology, which keeps the working ends sharper longer.

Points of Performance

- EverEdge™ 2.0 Technology provides consistently sharp, long-lasting cutting edges for efficient scaling
- Increased Rotational Control: The unique textured handle design has wave grooves and a special knurling texture for secure rotational control, providing a light secure grasp
- Easy Instrument Identification: Eight distinct colors allow clinicians to quickly and easily select instrument types that follow a color-coding system based on the specific area of the mouth where it is used

Instrument Maintenance

Regular maintenance is vital to longevity and performance of Instruments. Scalers and curettes should be kept sharp and true to their original design. Dental procedures are most effective when using sharp instruments because they reduce fatigue, improve deposit removal, save time, enhance tactile sensitivity, and minimize patient discomfort.

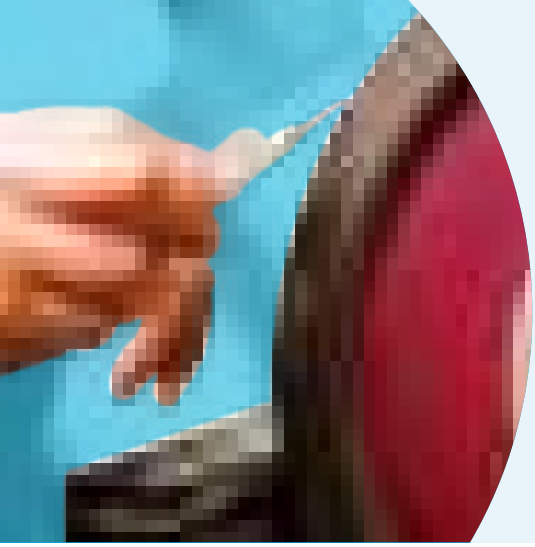

Sidekick™ Sharpener

The Sidekick™ Sharpener is designed for routine maintenance sharpening of scalers and curettes. Instrument guide channels help control blade angulation, providing consistent sharpening results. Requiring 2 AA batteries, Sidekick is compact and cordless, allowing for use anywhere in the dental office.

From Extra Fine to Coarse grit levels, HuFriedyGroup offers a complete selection of natural and synthetic sharpening stones to help you maintain the perfect edges on your dental instruments.

Arkansas

Natural Arkansas stones are available in fine and super fine grits - ideal for daily sharpening of dental instruments. Arkansas stones should be coated with a thin layer of sharpening oil prior to use in order to prevent clogging and ensure top performance. Arkansas Stones can range in color from a solid grey to a marbled light grey or white.

Procedural

Preventive care is critical to the success of a dental practice. That's why we created our procedural line of preventive products. Designed with both professionals and patients in mind, more hygienists choose our procedural products as they offer superior patient comfort. Choose our Twist™ Plus Prophy Angles that provides a smooth, splatter-free cleaning experience or our traditional, ergonomic, smooth-running Sparkle™ Prophy Angles. Compliment this with our patient-pleasing Sparkle V™ Varnish and Sparkle™ and Sparkle™ FREE Prophy Pastes.

Prophy Angles

Our Prophy Angles are designed with the clinician in mind. With a variety of angle and brush options, including the revolutionary Twist line of prophy angles, there is a DPA for every patient and hygienist.

Learn more about our Prophy Angles.

Twist™ Prophy Angles

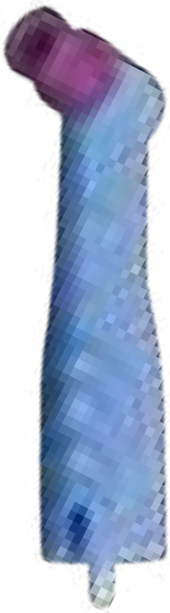

The original Twist™ Prophy Angle features an ergonomically designed angle that provides a 90˚ reciprocating “back and forth” rotating motion for continuous contact. This smooth back and forth motion reduces frictional heat build-up, keeping the tooth surface cooler and reduces splatter. The soft web cup and ribbed flair edges provides easy application and spreading of prophy paste.

Twist™ Plus Prophy Angles

The new ergonomic design of the Twist™ Plus Prophy Angle improves handling and reduces spatter. The robust gear mechanism provides a smooth, continuous motion. A recessed grip enhances the ergonomics of the angle providing a secure and comfortable grasp. The smaller head improves visibility and increases maneuverability. Enhanced cup fluting improves interproximal application 120° reciprocating motion allows for continuous-contact polishing.

Twist™ Plus

Oscillating Disposable Prophy Angles

The Twist™ Plus Oscillating Disposable Prophy Angles are the ONLY disposable prophy angle that oscillate 120° in a smooth, continuous counter-rotational motion to eliminate the splatter and frictional heat associated with traditional 360° spinning prophy angles.

Crowns

Stainless Steel Pedo and Permanent Crowns are pre-trimmed and crimped, for quick and simple placement. Accurate occlusal anatomy that mimics the natural tooth. Ideal occlusal thickness, offering superior resilience to abrasion and perforation.

Learn more about our Pedo and Permanent Stainless Steel Molar Crowns.

Primary Crowns

Stainless Steel Pedo Crowns come in 48 sizes for use on the first and second primary molars. These crowns feature a more narrow mesial-distal maxillary first primary molar width for quicker adjacent crown placement.

Stainless Steel Molar Crowns

Experience the Perfect Fit for All Patients

No matter what patient walks through your door, HuFriedyGroup now has you covered more than ever before. **Our line of Stainless Steel Crowns has expanded to include Permanent Molar Crowns!** All of our Stainless Steel Crowns deliver all the features and benefits of our Pedo Crowns that you love, but now in the form of Permanent Crowns as well.

POINTS OF PERFORMANCE

These stainless steel primary and permanent molar crowns were developed to deliver consistent, accurate and predictable clinical outcomes, while allowing the practitioner to work more effectively and efficiently, ensuring more time for value-added services such as patient education and treatment planning.

- More narrow mesial-distal maxillary first primary molar width for quicker adjacent crown placement
- Ideal wall height meaning less trimming and crimping (if at all!)
- Pre-trimmed, crimped and contoured surfaces for less time spent chairside
- Accurate occlusal anatomy mimicking the natural tooth
- Optimal occlusal thickness with superior resilience to abrasion and perforation

Design Rationale:

Throughout history dentists have been taught to extract teeth in the easiest direction — towards the thinnest, supportive buccal bone. However, this technique leads to ischemic or traumatic bone loss of buccal bone resulting in cavernous buccal depressions that will not adequately support an implant. Based on personal experience, if a mesial/distal approach is used, the buccal and lingual bone is preserved and bone regeneration occurs. This enables successful implant positioning and predictable osseointegration. This is why the Hoexter Mesial/Distal Luxating Elevators are designed to protect the osseous ridge in tooth extractions by luxating roots in the mesio-distal plane.

– Dr. David Hoexter

Slim Luxating Elevators

Slim Luxating Elevators are 13-20% thinner than standard luxating elevators. They are used to sever periodontal ligaments and used in a rocking motion vs standard elevators which are used in a lifting motion. Short elevators are 10.16mm shorter than long elevators.

Best in Practice Fact

Luxating elevators are used with periotomes and apical forceps to conduct atraumatic extractions.

Standard Luxating Elevators

Luxating elevators have thin, sharp blades that are used to sever periodontal ligaments and used in a rocking motion vs standard elevators which are used in a lifting motion. Luxating elevators reduce putting pressure on adjacent teeth.

Luxating Hybrid Elevators

Designed with thin, precisely angled tips and a large diameter handle, the Luxating Hybrids provide improved apical and interproximal access for enhanced oral adaption, aiding in the preservation of the buccal plate by severing the periodontal ligaments during atraumatic extractions.

Apical Forceps

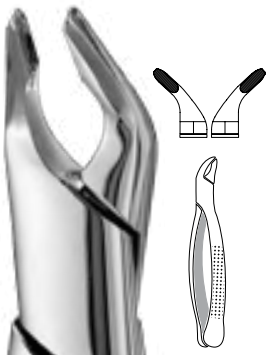

Our forged Apical Forceps feature thin, anatomical tapered beaks and longitudinal serrations to penetrate the surrounding bone and firmly grasp the root and crown structure with multiple points of contact, reducing the chance of crushing or fracturing the crown. Clinicians therefore are able to preserve the bone and reduce the risk of root and buccal plate fractures, enhancing clinical outcomes.

Atraumair Forceps

Our Atraumair Forceps are designed for optimal access and enhanced crown and root engagement. Each of the 13 uniquely patterned forceps feature a *Matte Finish* for reduced light reflection. Unique hole designs help reduce the weight of the forceps and provide increased comfort and control. Atraumair forceps offer improved access for a variety of extraction cases through enhanced beak geometries.

Extraction Forceps Reference

Forceps Beaks

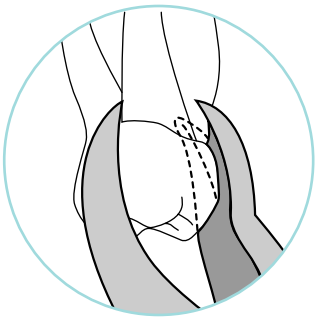

The beaks of extraction forceps are anatomically designed to adapt to the tooth at or below the cervical line. Therefore, beaks are either conical, bifurcated, or trifurcated in order to adapt to the tooth or furcations. Many beaks are serrated, which offers additional grasp when extracting teeth.

Bifurcated

Trifurcated

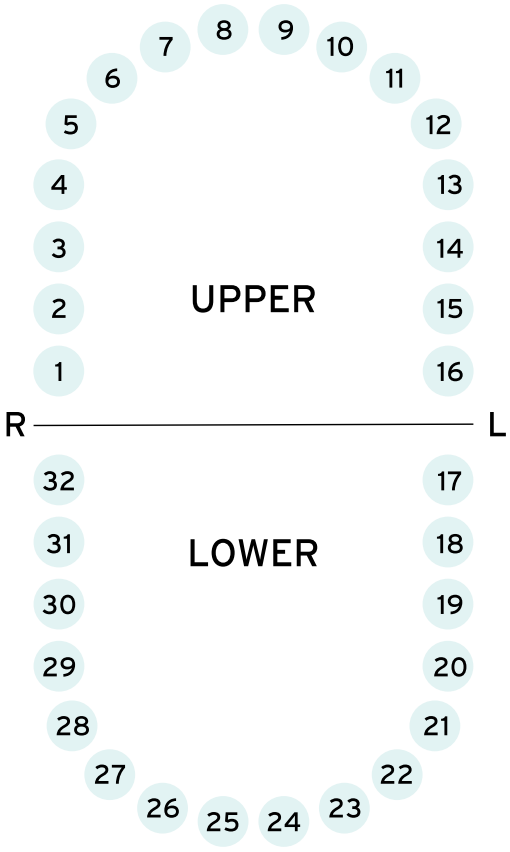

Serrated

Care of HuFriedyGroup Forceps

To maintain proper function and appearance, the following points should be adhered to:

- Clean and sterilize in an open position.
- Clean and thoroughly dry forceps before wrapping for sterilization.

Important

- Lubricate with Instrument Lubricant after cleaning and before sterilization to ensure smooth working action.
- Use ShineRenew wipes to correct hard-to-operate forceps. Rust spots or sediment can be wiped off, as they do not penetrate the surface.
- Do not allow forceps to remain in water or steam moisture for long periods.
- Keep forceps away from strong mineral acids and fumes.

Needle Holders

Our Perma Sharp™ Needle Holders feature tungsten carbide inserts with a matched diamond-cut pyramidical profile for enhanced longevity, a secure, positive suture needle grasp and reduced risk of cutting the suture material.

Learn more about our Needle Holders.

Microsurgical Needle Holders

Microsurgical needle holders have a lock to ensure that the needle is firmly secured. This allows the needle to be guided through coarse gingival tissue with controlled grip pressure.

Scissors

Our Scissors are designed to exact specifications for balanced and smooth control. We offer an extensive selection including microsurgical, suture, crown and gold, bandage and general surgery scissors.

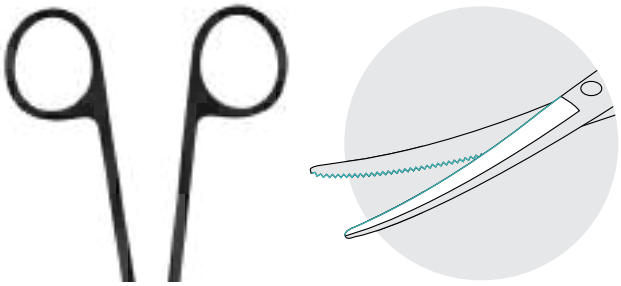

Learn more about our Scissors.

Scissors Styles

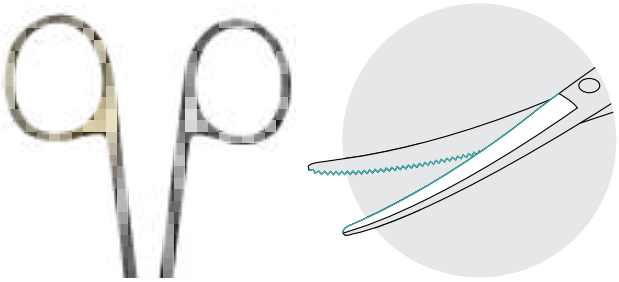

Perma Sharp™ Scissors
Featuring tungsten carbide inserts bonded to surgical-grade stainless steel on both cutting edges for smooth, controlled cutting and maximum durability.

Black Line Scissors with Super Cut Blades
Feature a performance engineered coating for optimal edge retention, reduced light reflection afforded by the black matte finish, and enriched contrast and visual acuity at the surgical site and underlying tissue.

Super Cut Scissors
Cutting blade honed/serrated to "razor" sharpness with opposing blade finished with fine serrations to avoid tissue slippage.

Standard Series Scissors
A wide array of cutting blades to fit a variety of needs.

Rubber Dam Clamps

Our Rubber Dam Clamps are made from proprietary Satin Steel™ Alloy for corrosion resistance, superior strength, and a fine balance between flexibility and memory. Their matte finish absorbs and dissipates light instead of reflecting it back, so you can experience a comfortable field of vision that is easier on the eyes — to help you be **The Best in Practice**.

Easily identify the perfect Rubber Dam Clamp for your procedure with our interactive Pick Your Perfect Clamp Tool.

Clear Collection™ Instruments for Clear Aligners

The innovative Clear Collection™ Instruments for Clear Aligners are designed to accent, individualize and optimize the biomechanics of the “invisible” aligner experience with no heat required.

Learn more about our Clear Collection™ instrument set.

The Tear Drop
Creates droplet-shaped notches on gingival margins.
678-800

The Vertical
Creates rectangular indentions at the mesial or distal line angles on facial and/or lingual of a specific tooth to generate rotational couples.
678-801

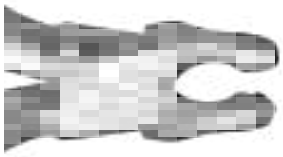

The Horizontal
Creates rectangular indentations at the gingival margin to accent individual root torque. Place below a bonded attachment to enhance retention.
678-802

The Hole Punch
Cuts 6 mm half-moon shape on the ginigival margin where bonded buttons are to be placed.
678-803

The Bite Plane
Places a bite ramp "out-dent" on the palatal surface in the upper anterior of clear aligners.
678-809

The Spot
Creates 1 mm dimple for spot contacts to accent small individual tooth movements or added aligner retention.
678-804

The Petite Punch
Cuts a 4.5 mm half-moon shape for use on the gingival margin where bonded buttons are to be placed.
678-805

The Counter Clockwise Wedge
Creates indentions at the line angle on the facial and the opposite line angle on the lingual for a specific tooth.
678-807

The Clockwise Wedge
Creates indentions at the line angle on the facial and the opposite line angle on the lingual for a specific tooth.
678-808

The Bootstrap Punch
Cuts precise elongated cutout to accommodate bonded buttons on the labial and lingual sides of mandible and maxillary gumlines.
678-810

The Eraser
Eliminates unwanted or no-longer-needed indentions anywhere on clear aligners.
678-811

The Precision Aligner Punch™
Creates cutouts for incorporating Precision Aligner Buttons® and elastics on the upper and lower molars.
678-812

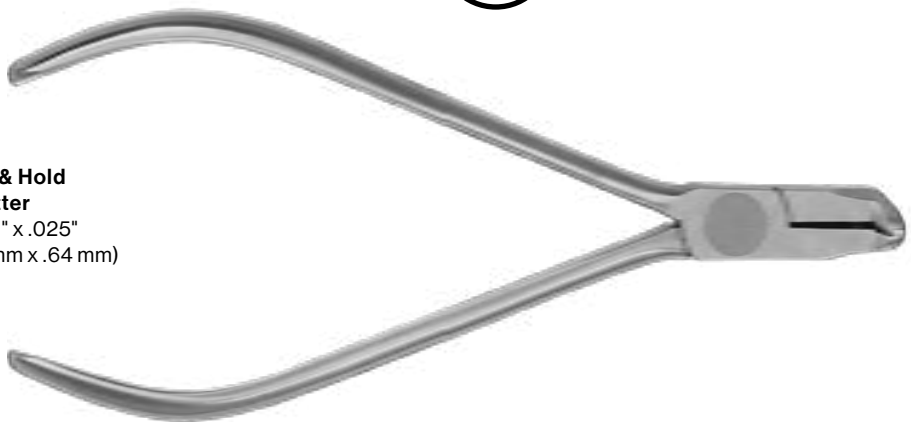

The Multi Punch
Creates precise ellipsoid cutouts on the difficult-to-reach occlusal aspect of clear aligners.
678-813

Cutters

With our diamond-honed cutting edges and orbit-formed joint, you will experience sharp and accurately-aligned cutting edges for every procedure, every time. For each individual area of focus, we provide a specifically engineered cutter. To meet these stringent standards, all of our blades are hand-finished to maximize cutting performance for the appropriate wire size.

Learn how to extend the longevity of your cutter with regular sharpening through HuCare.

Air Polishing

Our PWR air polishing products utilize PWR Prophylaxis Powder combined with air and water to supra- and subgingivally remove biofilm and the tough stains caused by everyday foods and beverages. Air polishing also helps remove interproximal biofilm and food debris.

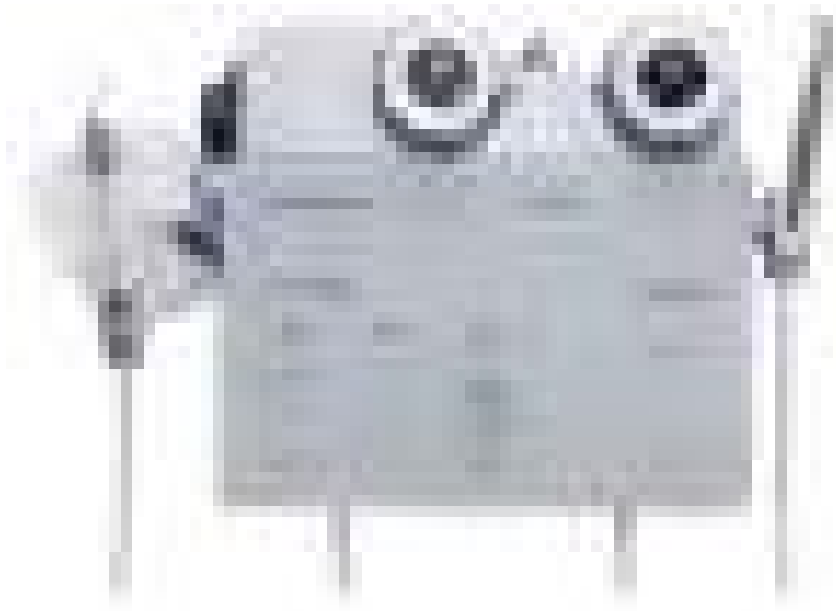

PWR Pair

The power of all-in-one brings versatile air polishing to every clinician treating every patient. The PWR Pair brings you the power of sub- and supragingival calculus and stain removal, biofilm disruption, and implant cleaning.

Piezo Reference Guide

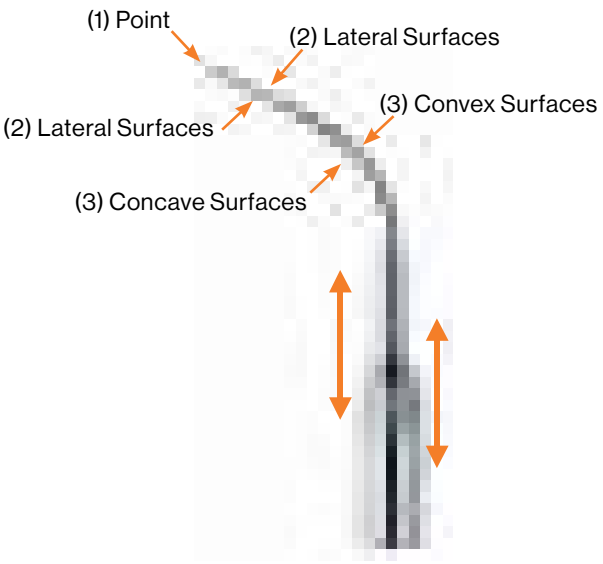

Characteristics of Tip Movement

The smooth linear movement generated by piezoelectric systems creates a stroke pattern that is similar to hand instrumentation. Adapting the lateral surface of the piezo tip against the tooth surface (similar to a hand instrument) will increase clinical efficiency.

Essentials of Power Dispersion

- Most of the energy is dispersed at the point of tip (1).
- The lateral surfaces of the tip (2) are moving in a linear pattern, similar to the stroke of a bladed hand instrument.
- Adaptation of this lateral surface provides the most efficient deposit removal.
- Adapt the terminal 2–3 mm of tip for optimal performance.
- When concave front or convex back surfaces (3) are adapted to the tooth surface, the instrument will chatter against the surface rather than effectively remove deposit.

Power Dispersion

Piezo Tip Adaptation

- Adapt the lateral surface to the tooth for optimal performance.
- Maintain tip angulation near zero degrees — parallel to tooth surface.
- To minimize the risk of root damage, never adapt tip at a 90˚ angle.
- Use little or no lateral pressure and let the tip do the work for you.
- When concave front or convex back surfaces are adapted to the tooth surface, the instrument will chatter against the surface rather than effectively instrument.

Sensory Observations

- Smooth vibration enhances tactile sense for instrumentation.
- The smooth motion of the tip is an excellent option for patients with root sensitivity.
- Piezo tip vibration is very smooth and quiet when adapted correctly on a lateral surface.
- Deposits are pulverized, resulting in a slurry of debris that is visible in the water at the back of the mouth.
- Calculus is generally not removed in big chunks as commonly seen during magnetostrictive instrumentation.

Lateral surface of tip in use

Best in Practice Fact

To achieve the greatest efficiency and patient comfort, it is best to adapt the lateral sides of your piezoelectric instrument to the surface of the tooth.

Piezo Tip Cleaning and Care

Cleaning & Sterilization

- Piezo tips remain in the Piezo Torque Wrench during the complete cleaning, disinfection and sterilization reprocessing cycle.
- Clean using ultrasonic cleaner or thermodisinfector.
- Steam sterilize for at least 4 minutes at 270°F/132°C or 30 minutes at 250°F/121°C. Do not heat above 275°F/135°C.
- Recommend at least 30 minute dry time after sterilization cycle.
- Clean, disinfect, inspect and steam sterilize before each use following the respective equipment manufacturer's users instructions.
- Do not expose to phenols, iodophors or dry heat sterilization.
- Detailed care and maintenance instructions are available upon request or go to Hu-Friedy.com.

Tip Installation

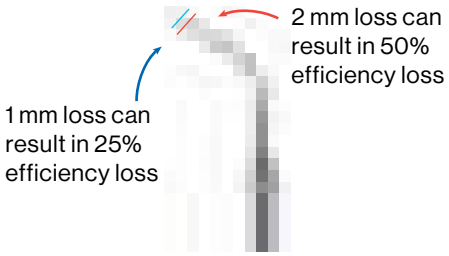

1. Your Hu-Friedy Piezo tip comes with its own Piezo Torque Wrench.
2. Attach tip to handpiece using the Piezo Torque Wrench by aligning the threaded end of the tip to the handpiece.
3. Rotate the Piezo Torque Wrench clockwise. Once the instrument is screwed all the way in, give an extra quarter of a turn to obtain the required torque. Incomplete tightening may cause the tip to become loose or lack vibration.
4. When using the Piezo Torque Wrench without a tip previously inserted into the tip carrier, take the following step: place the Piezo Torque Wrench over the tip by slipping tip through the small hole in the bottom, closed end of the tool. This will position the tip within the Piezo Torque Wrench for safety and convenience.

Application Chart	S10	U	100	P10	P3	4R 4L	1D	2RD 2LD	P	AFS AFL AFR

Light to moderate deposits in shallow pockets		●	●		●		●		●	●
Light to moderate deposits in deep periodontal pockets					●		●	●		●
Moderate to heavy deposits in deep periodontal pockets						●				
Furcation areas								●		●

Tip Removal

1. Hold the handpiece vertically. Insert the tip through the hole in the bottom of the Piezo Torque Wrench.
2. Depress wrench slightly while rotating to fully secure tip to wrench.
3. Turn the wrench counter-clockwise to loosen and remove tip from handpiece.
4. Once removed from handpiece, do not remove the tip from the wrench carrier.

Replacement of Worn Tips Actual Size Guide

Optimum Efficiency

Scaling efficiency can significantly diminish with worn tips. Inferior performance and poor water delivery can result from worn, damaged, bent, or altered tips. For optimal scaling efficiency, we recommend checking tips regularly for signs of wear.

How To Use Your Wear Guide

1. Locate the diagram of the insert to be measured (use color as guide).
2. Position point Ⓐ to point Ⓑ as shown and/or align the curvature of the tip (circled) to match the guide.
3. Rotate insert until tip is flat against the card.
4. Evaluate tip condition, comparing length to red/blue bars.

Reorder tips when 25% efficiency loss (blue bar)

Infection Prevention & Instrument Management

Infection prevention is the cornerstone of every successful dental practice. While transmission of infectious agents and diseases in the dental setting is rare, it does happen, which is why it's critical to continually reinforce the importance of best practices and industry standards. We have the solutions you need to create a culture of safety, compliance, and efficiency at your office.

Instrument Management

Our cassette-based Instrument Management System (IMS) allows you to move instruments from cleaning to chairside efficiently and safely through reduced handling of contaminated instruments. By removing multiple time-consuming and potentially dangerous steps in the process, IMS™ Cassettes can save your facility five to ten minutes per procedure, reduce the chance of sharps injuries, and protect your bottom line through instrument integrity and increased productivity - all while promoting compliance to infection prevention standards of care.

The Benefits of the Instrument Management System

1. Chairside: Patient Preview & Presentation

- Organize instruments according to procedure, allowing for more focus on patients and less time spent searching for missing instruments.
- Neatly organized instruments offer a more relaxed and professional appearance to help ease patient anxiety and enhance referrals.

2. Cleaning: Processed & Prepped

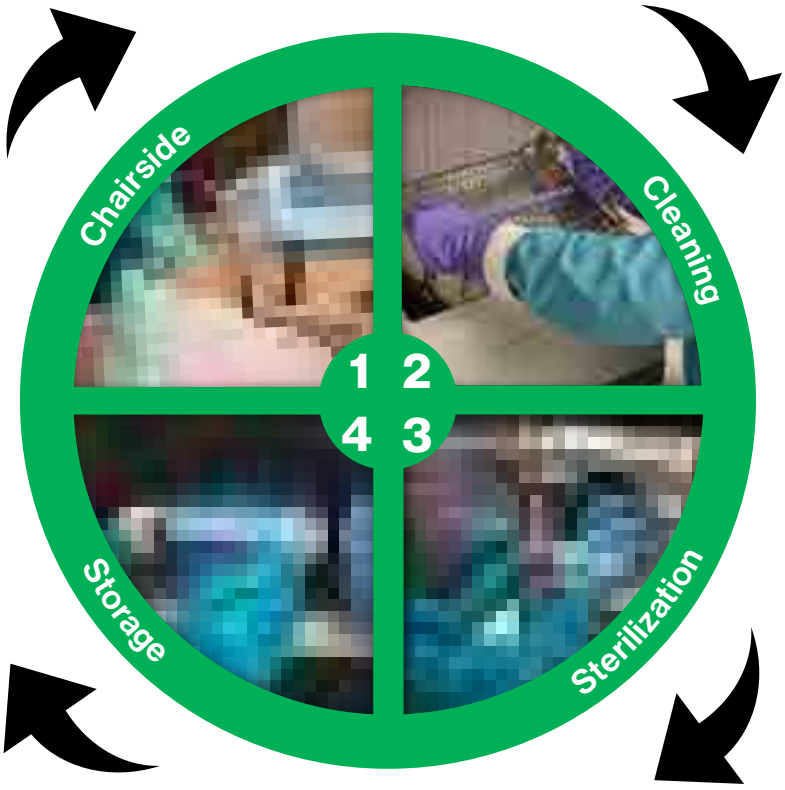

- Instruments are kept together throughout cleaning, rinsing and drying, reducing the potential for breakage or loss.
- Handling of instruments is virtually eliminated, saving time and increasing safety.

3. Sterilization: Wrapped & Ready

- Instruments properly separated on rails and held in cassettes, help prevent overloading of the sterilizer and support an optimal environment for sterilization.
- Handling only wrapped cassettes provides a safer and more efficient protocol.

4. Storage: Neat & Complete

- Ready for use or storage until needed for increased time savings.
- Complete procedural set-ups make it simple for onboarding or for anyone to set up or turn over a treatment.

Saving with IMS

Save Time

The sterilization area is the heart of a dental clinic, where everything, and everyone flows in and out. An inefficient sterilization area will impact the entire practice. Facilities that implement IMS cassettes, eliminate time consuming and dangerous steps that add up to a savings of 5 to 10 minutes per procedure – up to an hour or more a day.

Save Space

IMS™ Infiniy Series™ Points of Performance

Ergonomic latch with positive locking mechanism is safe and easy-to-use, allows one-handed opening and visual confirmation if the cassette is locked/unlocked.

Revolutionary new hole pattern design provides more access to instruments during cleaning and sterilization and increases compatibility with today's cleaning equipment, including automated washers.

Innovative color-coded silicone rail system, available in 11 color options, significantly reduces instrument contact, allowing for more water flow while protecting the instruments during reprocessing.

High quality, electropolished stainless steel protects against corrosion while providing a professional appearance.

Smooth round corners and slotted edges increase drainage and reduce drying time.

Beveled edge allows for a more ergonomic grasp.

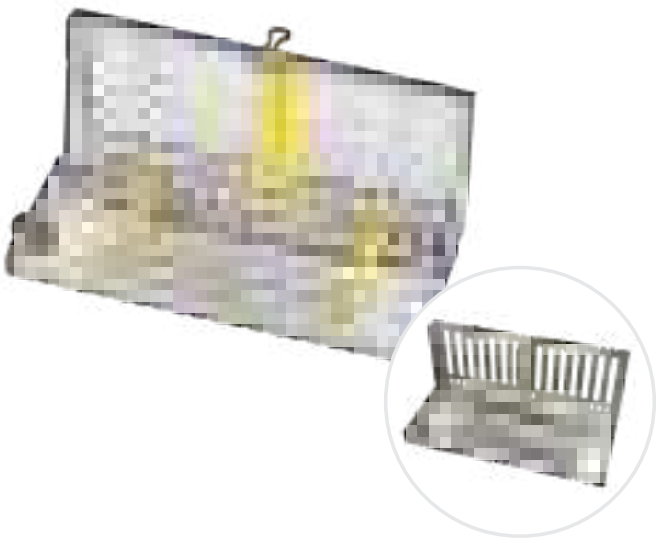

Cassettes & Accessories

Infinity Series™ and Signature Series™ Cassettes are manufactured from high quality, electropolished stainless steel shells to protect against corrosion while providing a long-lasting, professional appearance. IMS™ Cassettes feature medical-grade silicone rails, robust and ergonomic latches with positive locking mechanism, and are available in multiple sizes and colors that can be configured to best fit the needs of your facility.

Cassette Replacement Parts

There are times where instrument rails or other small cassette components need replaced after a long time of use. Replacement items are available to keep your cassettes looking like new.

Infinity Series™ Replacement Rail Packs

Replacement packs provide both the compression and instrument rails for your Infinity Series™ Cassettes. It is best to replace them all at the same time for consistency. To identify which pack you need, look at the lid of your Infinity Series™ Cassette. If you have two embossed stripes across the lid/infinity pattern, you need to order the replacement pack for the embossed lid.

ADA CDT Coding Collection Series

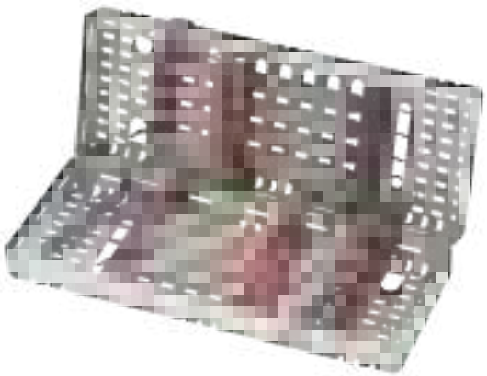

We have created a collection of procedural instrument kits that follow American Dental Association (ADA) — Current Dental Terminology (CDT) Coding. Start pairing patients and insurance codes more effectively to move from standardized care to personalized care. Each kit, uniquely color-coded, offers the highest quality, technology, and ergonomic instrumentation within a small, space-efficient cassette for ensured equipment compatibility and safety.

Procedural Tubs

Together, procedure tubs and cassettes are an efficient and organized system for managing instruments and disposables by procedure. The time savings achieved by using IMS™ Cassettes and procedural tubs allows staff to spend more time on value added activities in the facility. Tub colors are designed to match the IMS™ Cassette rail colors and are treated with Sanafor® P0-5 antimicrobial* to protect the product by helping prevent the growth of stain and odor causing bacteria.

Organizational Tubs

Organizational tubs are available as complete tubs with accessories or can be ordered separately. Tubs available in 11 colors to match IMS™ Cassette rail colors.

Signature Series™ Complete Tub
Each Tub includes: Tub Liner, Dividers, Single Tub Cup With Cover, Double Tub Cup With Cover, Divided Slide Tray, Locking Tub Cover

Instrument Reprocessing & Sterilization

Instrument reprocessing is a key part of any office infection control program and must be performed properly to help ensure patient safety. We offer a full line of cleaning and sterilization products to help you optimize staff and patient safety while maximizing office efficiency.

Cleaning & Care

The cleaning step is the essential first step in instrument reprocessing. Cleaning uses specialized solutions, such as enzymatic detergents, to aid in the removal of organic and inorganic matter from instruments. The cleaning efficacy of an automated washer-disinfector and/or an ultrasonic bath can be easily checked with the use of specialized monitors.

Learn more about our Cleaning & Care products.

Enzymatic Solutions

Enzymatic cleaners are used to aid in the cleaning and decontamination of instrumentation and contain enzymes, which help to break down soils, including blood, protein and other proteinaceous debris. These solutions can be used for both manual and automated cleaning processes.

Enzymax™ Dual Enzyme Ultrasonic Detergent

Enzymax™ Dual Enzyme Ultrasonic Detergent is specifically formulated for efficient ultrasonic cleaning or pre-soaking of cassettes and instruments. Contains Steelgard® Agents to protect instruments from harmful minerals naturally found in water that contribute to buildup, spotting and corrosion. Can also be used as an evacuation system cleaner. Available in a variety of formats to meet your office needs.

Biological Monitoring

Biological indicators are the gold standard of sterilization monitoring because they directly determine whether microorganisms are destroyed from the steam sterilization process. We offer a wide range of biological monitoring products for both in-office and mail-in sterilizer monitoring.

Learn more about our Biological Monitoring products.

ConFirm Rapid Read 20 Minute Biological Monitoring System

Determines the efficacy of steam sterilization cycles in just 20 minutes. Results are automatically provided on the reader LCD display screen, eliminating the need to interpret results.

ConFirm™ Rapid Read
20-Minute System

Twist & Flick Activation reduces contamination potential and **eliminates need for a separate activator device**

When frequent sterilizer testing is needed and time is of the essence, release an instrument load into service in just 20 minutes.

- An enzyme-based detection system between the biological indicator and reader provides results in just 20 minutes
- Glass-free design helps ensure staff safety
- Simple Twist & Flick activation reduces contamination potential and eliminates need for a separate activator device
- Results are read automatically and indication given via lights at each well of the incubator

The Best In Practice

In-Office

To test if a sterilizer is functioning properly, simply process a test indicator vial in a normal steam sterilization cycle, remove, crush vial and place in incubator along with an unprocessed and crushed control vial for the required incubation period. Media in test vial will stay purple signifying a passed test and will turn yellow if any spores remain alive, indicating a failed test. Growth of surviving spores has been observed in as little as 2.5 hours.

Chemical Monitoring

Chemical indicators are used to monitor the sterilization process by changing color or form with exposure to one or more physical conditions of the sterilization process. We offer a range of chemical indicators, from single variable process indicators to more advanced integrating indicators which react to all critical variables.

Learn more about our Chemical Indicators.

Multi-Parameter & Integrating Indicators

Type 5 STEAMPlus™ Integrators
Type 5, multi-variable sterilization monitor designed to react to all critical variables in the sterilization cycle: time, temperature and presence of steam. Utilizes a moving front indicator technology, which is an advancing color bar moving from reject to accept, eliminating the need to interpret or match colors.
4" x 0.75" (101.6 mm x 19.5 mm)

100 per pack	**SSI-100**
1000 per pack	**SSI-1000**

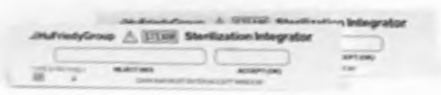

STEAMPlus™ Sterilizer Test Pack
Contains a Type 5 STEAMPlus™ Sterilization Integrator inside a challenge pack. Features the SteamPlus™ Type 5 Integrator placed inside of a single use process challenge device test pack. Reacts to all three critical process variables; time, temperature and presence of saturated steam. FDA cleared as equivalent in performance to an AAMI BI Test Pack (PCD). ISO 11140-1 Type 5 Compliant.
6.5" x 4.75" (165.1 mm x 120.65 mm)

25 per box	**STP-025**

Type 4 Steam Indicator Strips
For use to monitor gravity and prevacuum steam sterilization cycles 121-135C (250-275F). Multi-parameter – indicates if all conditions for steam sterilization have been met, during steam sterilization the check mark turns from white to black.
3.75" x 6.25" (95.25 mm x 158.75 mm)

100 per pack	**SCK**

Type 5 IMS Steam Sterilization Integrators
Type 5, multi-variable sterilization monitor designed to react to all critical variables in the sterilization cycle: time, temperature and presence of steam. Utilizes a moving front indicator technology, which is an advancing color bar moving from reject to accept, eliminating the need to interpret or match colors.
4" x 0.75" (101.6 mm x 19.5 mm)

100 per pack	**IMS-1241**

Process Indicators

Dry Heat Chemical Indicator Strips
Process indicator for use in dry heat sterilizers. Provides a distinct color change from green to dark when processed in dry heat. Writable strip for record keeping. ISO 11140-1 Type 1 Compliant.
3.94" x 0.62" (100mm x 16mm)

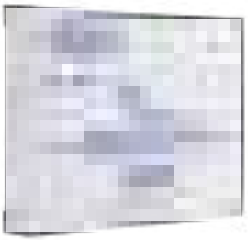

100 per pack **DIS-100**

IMS Steam Sterilization Indicators
Indicator strips verify that steam sterilization parameters of time and temperature have been met. Use one in each cassette or pouch sterilized and retain for office records. For use in steam sterilizers 250°F–285°F (121°C–141°C). ISO 11140-1 Type 1 Compliant. 4" x .56" (101.6mm x 14.2mm)

250 per box **IMS-1240**

Bowie Dick Test Pack

Type 2 AirView™ II Bowie-Dick Test Pack
The Bowie Dick Test Pack detects the presence of air in pre-vacuum (type B) steam sterilizers. Its easy-to-read test sheet clearly identifies failures and can be filed for record keeping. Includes lead-free ink that reduces amount of hazardous waste and can be disposed in regular trash. Compact size of the Bowie Dick Test Pack reduces waste and storage and is ISO 11140-1 Type 2 Compliant.
5" x 3.75" (127 cm x 95.25 cm)

30 per box **MBD030**

Sterilization Tape

Indicator tape is designed to hold wrapped packs together and to demonstrate that the pack has been exposed to the steam sterilization process. The chemical process indicator ink provides a distinct ink color change from beige to dark brown/black which easily distinguishes between processed and unprocessed packs. Pre-printed tape is available with specific procedural set-ups, colors or blank.

Lead-Free Steam Indicator Tape

Made with adhesive and ink that is free of natural rubber latex, lead or solvents; safer for your patients, staff and the environment. Validated for use with all common dynamic-air-removal (pre-vacuum / SFPP) and gravity steam sterilization cycles. Available in 3/4" (18 mm) and 1" (24 mm) width by 60 yd (55 m.)

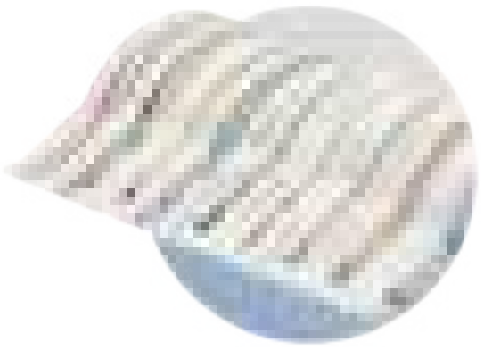

Lead Free Blank Indicator Tape
Made with adhesive and ink that is free of natural rubber latex, lead, or solvents. Safer for patients, staff, and the environment. Validated for use with all common dynamic air removal (pre-vacuum/SFPP) and gravity steam sterilization cycles.

Sterilization Wrap

Sterilization wraps are used to wrap instrument sets and cassettes for sterilization. Wraps allow the penetration of steam to sterilize the contents and maintain sterility of the processed item after sterilization. We offer a number of wrap opitons to meet your needs.

Learn more about our Sterilization Wrap.

IMS™ Autoclave Sterilization Wrap

Our IMS™ Autoclave Sterilization Wrap is engineered to withstand the harsh conditions of steam sterilization, and offers the best combination of softness and added strength. Its low linting helps minimize potential sterilizer malfunction. Its memory free wrap lays flat once opened post sterilization.

Bonded Double Sterilization Wrap

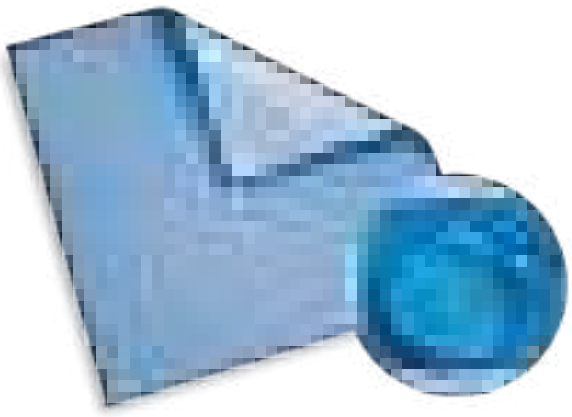

Bonded Double Wrap is made from two bonded sheets of SMS polypropylene material allowing dental practitioners to be in compliance with the most stringent sterilization standards for healthcare settings set forth by ANSI/AAMI ST79 and CDC Guidelines. Its edges are ultrasonically bonded together to form a single, two-ply application that provides enhanced safety and increased efficiency and productivity during wrapping and unwrapping. The two sheets are different colors which aids in identifying breaches in the packaging post sterilization and allows package differentiation by color. High strength and durability aid in resistance to tears and punctures, protecting contents of the package during storage and transportation. Compatible with the most common sterilization cycles, the material is also recyclable for reduced waste. Manufactured for single use only.

Crosstex™ CSR Sterilization Wrap

Our Crosstex™ CSR Sterilization Wrap is manufactured from environmentally-friendly cellulose material made from wood pulp, not petroleum, eliminating skin sensitivity issues associated with oily residues inherent in plastic based wrappers. This wrap serves as a bacterial barrier to both airborne and waterborne contamination.

Sterilization Pouches

Sterilization Pouches are used to package instruments for sterilization. They allow sterilization of the enclosed instrumentation and maintain sterility post sterilization, while providing aseptic delivery. Sterilization pouches are designed to contain a single instrument, multiple instruments or instrument cassettes depending upon the pouch size.

Bagette™ Self-Sealing Sterilization Pouches

Bagette™ Self-Sealing Sterilization Pouches include process indicators located both internal and external to the instrument/cassette area that respond to all sterilization variables: time, temperature and saturated steam. Thick, strong seals protect against cassette and instrument breaches. Medical grade paper provides strength and durability. Multi-layer blue film allows user to easily see any tears in film. Their thumb notch allows for easy opening of the pouch. A wide self-seal adhesive strip easily and securely seals pouch to provide reliable seal. Not made with lead or natural rubber latex.

Duo-Check™ Self-Seal Sterilization Pouches

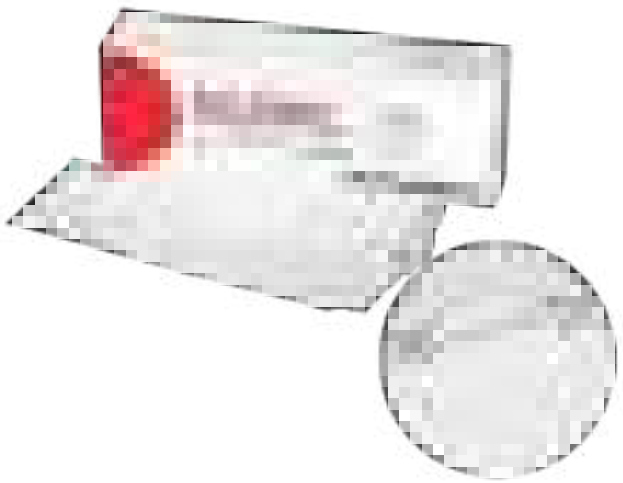

Duo-Check™ Pouches include built-in internal/external process indicators that change color when exposed to a specific temperature. Manufactured from medical grade paper with extra-wide chevron to protect against instrument breaching, thumb-notch for easy opening. Their 6 corner tack seals prevent curling and other potential contaminants from entering pouch upon opening and a perforated fold to help ensure the adhesive strip forms an airtight seal. Once sterilized, contents will remain sterile for up to 3 years provided the integrity of the pouch has not been compromised. For use with steam and EtO sterilization processes only. Not made with natural rubber latex.

Sure-Check™ Self-Seal Sterilization Pouches

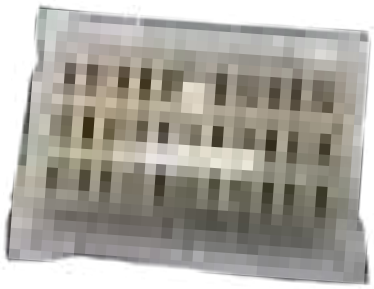

Sure-Check™ Pouches contain built-in, multi-parameter internal/external process indicators that change color when all three criteria for sterilization have been met – time, temperature and pressure (steam). These pouches are manufactured from medical grade paper with extra-wide chevron to protect against instrument breaching. Thumb-notch for easy opening. Sure-Check™ Pouches include six corner tack seals to prevent curling and other potential contaminants from entering pouch upon opening. Perforated folds help ensure the adhesive strip forms an airtight seal. For use with steam and EtO sterilization processes only. Not made with natural rubber latex.

Sterilization Containers

Sterilization Containers are a reusable, rigid system used for the packaging of cassettes and instruments during sterilization. An alternative to the wrap and pouch materials commonly used to package cassettes and instruments, Sterilization Containers provide significant economic and environmental benefits along with enhanced safety.

Learn more about our Sterilization Containers.

Containers

Sterilization Containers are uniquely sized to fit many Hu-Friedy cassettes, including the Container Cassette that features an integrated handle for easy insertion and removal. Available in four sizes to hold a variety of contents. Suitable for use in pre-vacuum Steam Sterilizers.

Container Accessories

Container Indicator Card, Single Use
Container Indicator Cards should be placed on the outside of Sterilization Containers each time the container is sterilized in order to indicate proper exposure to sterilization parameters. Cards contain space to indicate key information including sterilization date, sterilizer # and load number. Single Use Only. Type 1 chemical indicator.

250 pieces **IMCO-INDNA**

Tamper Evident Seal for Sterilization Container Latches
Single use tamper evident seals are used to lock the latches of the sterilization container during and after sterilization in order to identify a sterility breach. Seals should be placed in each latch prior to sterilization. Latches are then broken upon opening the Sterilization Container for use. Single Use Only

100 pieces **IMCOM-SEAL**

Disposable Paper Filters, Blank, Single Use
Single use filter paper is placed in the lid and body of the Sterilization Containers to allow steam penetration during sterilization and to maintain sterility post sterilization.

100 pieces **IMCO-FIL3M**

Labeling & Accessories

Proper labeling of instrument packs is critical for tracking and storage post sterilization. We offer a labeling system that is easy to use on pouches and wrapped cassettes. The CDC recommends that instrument pack labeling include the sterilization date, sterilizer inumber (if using more than one sterilizer) and cycle or load number.

Personal Protective Equipment

Personal Protective Equipment (PPE) is a critical defense against cross contamination. Selecting the most appropriate PPE for a particular procedure or activity should be a key goal of your infection prevention program.

Face Masks

Face Masks cover both the nose and mouth during procedures that may generate aerosols, splashes or sprays of blood or body fluids, and while manually cleaning instruments. We manufacture an extensive portfolio of made-in-USA surgical masks and respirators to meet all your practice needs. Our award-winning, patented Secure Fit™ Technology face masks are the first masks on the market to feature adjustable aluminum nose and chin closures that minimize the potential of inhaling airborne contaminants by reducing gapping around the borders of the mask and provide a custom fit regardless of face shape or size.

Learn more about our Face Masks and Respirators.

N95 Respirators and Fit Test Kits

NIOSH-approved and FDA-cleared N95 surgical respirators achieve a tight facial fit and protect the wearer from airborne particles and from liquid contaminating the face.

Crosstex™ Isolator™ Duckbill N95 Surgical Respirator
This product is a NIOSH-Approved Surgical N95/FDA-Cleared Respirator with a flat-fold, duckbill design with dual head straps and malleable nose piece for superior filtration, fit and comfort. Indicated for use when treating patients with airborne diseases.
Meets guidelines for TB exposure control.
• Fluid resistant to penetration by synthetic blood at 120mm/Hg
• 99.9% BFE (bacterial filtration efficiency) at 3 microns
• 99.9% PFE (particulate filtration efficiency) at 0.1 micron
Large chamber for enhanced breathability. Soft inner lining for increased comfort. Not made with natural rubber latex. Complies with ASTM F3407- Respirator Fit Capability voluntary standard.

Saccharin N95 Fit Test Kit
The Occupational Safety and Health Administration (OSHA) requires that fit tests be conducted for those who need to wear respiratory protection, including N95 respirators, to ensure proper function and protection. Our Qualitative Fit Test (QLFT) Kits provide the ability to perform pass/fail fit tests that assess the adequacy of respirator fit based on the individual's response to a test agent.
- *Simple protocol that is easy to administer*
- *Includes solution for up to 55 tests*
- *OSHA and National Institute for Occupational Safety and Health (NIOSH) compliant*
- *Each kit includes 1 hood, 60 mL test solution, 60 mL sensitivity solution, 2 nebulizers, 4 replacement nozzles, 2 cleaning tools, and a flash drive with instructional information*

Face Shields

Use of face shields is recommended during procedures likely to generate splashes, spatter or aerosol. The central areas of the face are the most vulnerable for transmission especially during certain procedures. Use layered PPE like glasses, a mask and a face shield to increase the protection in these areas. Face shields protect your mask and face from direct spatter and may prolong mask life.

Learn more about our Face Shields.

Crosstex™ Disposable Face Shields

Crosstex™ Disposable Face Shields are made of high-quality, made-in-USA film that offers maximum clarity. Anti-fog treatment on both the inside and outside of the shield provides optimum visibility. One and a half inch vented foam headband holds shield away from face to improve airflow while exerting no pressure on temples.

Dental Unit Waterline Management

The long and narrow design of Dental Unit Waterlines (DUWLs) creates the perfect breeding ground for microbial growth. When untreated, or improperly maintained, the water flowing through these contaminated DUWLs and out through dynamic instruments used during treatment can potentially harm your patients, staff and practice reputation.

Dental Unit Waterline Testing

Treatment alone can't provide you the assurance you need in the quality of water in your waterlines. By regularly testing your waterlines, you can be confident in knowing your water is safe and compliant.

Learn more about our DUWL testing and treatment protocol management.

Continuous Treatment

Continuous treatment products are placed inside the independent water bottle or inside a J-box, cabinet or system that is directly plumbed to city water. These products are replaced based on time or water usage.

Learn more about our Continuous Treatment products.

DentaPure™ Cartridges

DentaPure™ cartridges elute non-allergenic elemental iodine into dental treatment water for 365 days or 240L. Treated water meets the current potable water standard of <500 CFU/mL and helps to reduce patient and staff bacterial exposure. Cartridges are available for dental units with independent water bottles, or units direct plumbed to city water. Use is not restricted by the EPA rule BMP for dental amalgam waste.

Hu-Friedy Waterline Filter

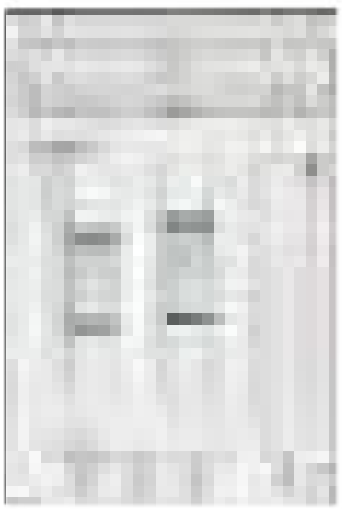

The Hu-Friedy Waterline Filter continuously works to deliver clean water to patients and staff for one year (or 240L). It inhibits growth of microbial contamination in dental waterlines. Treated water meets the current potable water standard of <500 CFU/mL. Ready-to-use cartridge that is easy to install. Use is not restricted by the EPA rule BMP for dental amalgam wastewater.

VistaClear™ DP Centralized Waterline Treatment System

The VistaClear™ DP Centralized Waterline Treatment System filters water centrally for directly connected dental operatories and provides a method for delivering compliant*, on-demand procedural water with reduced microbial contamination (<200 CFU/mL) and odor-causing bacteria buildup when used with the EPA registered DentaPure™ cartridge. It eliminates the need for dental bottles and water-storage tanks, and the need for purchased water and waterline tablet treatments for bottle systems.

Periodic Treatment

Periodic Dental Unit Waterline treatments rapidly work to remove bacteria and biofilm and slow the regrowth of biofilm. Following the application of these cleaner/shock products in a dental unit, the residual product must be flushed through the dental unit waterlines prior to patient treatment.

Liquid Ultra™ Solution

Liquid Ultra™ Solution is a powerful dental unit waterline cleaner/shock with multiple treatment options for external bottle systems. It kills biofilm bacteria; removes existing biofilm and prevents/suppresses formation of biofilm in DUWLs. Use is not restricted by the EPA rule BMP for dental amalgam wastewater.

Managing Scale and Deposits in DUWLs

VistaClean™ Irrigant Solution Concentrate is a daily solution derived from organic citrus botanicals that can be used during patient care. It helps prevent waterlines and equipment from deposits and scale and works to emulsify contaminants that can build up in waterlines.

Iodine Test Strips

For all iodinated dental unit waterline maintenance products, including the DentaPure™ cartridge and Hu-Friedy Waterline Filter. These tests strips should only be used to determine the level of iodine present in Dental Unit Waterlines, and should not be used to measure the presence of Colony Forming Units (CFU's). It is recommended to check the iodine level at 11 months, or as you approach 240L of water to ensure that the iodine output has not fallen below 0.5 ppm—particularly if you have a very busy practice.

SaniVac™ Evacuation System Cleaner D202

EfferZyme™ Enzymatic and Evacuation Line Cleaning Tablets D202

Enzymax™ Dental Instrument and Evacuation Line Cleaning Solutions D203

Evacuation Line Cleaning

Maintenance of the entire vacuum system needs to be considered. Untreated evacuation lines form clogs and can become sluggish from the build-up of debris, which can have an effect on the productivity and efficiency of a dental practice. Routine cleaning can help maintain optimal suction and prevent unnecessary downtime and costly line repairs.

SaniVac™ Evacuation System Cleaner

SaniVac™ Evacuation System Cleaner contains a unique, multi-proteolytic enzyme formula that efficiently neutralizes odor and removes a wider range of dental debris than surfactants alone. The non-oxidizing, pH-neutral solution meets the EPA's Best Management Practices for dental amalgam waste. Use daily or after each patient to help avoid downtime and costly line repairs. With SaniVac™ Evacuation System Cleaner, treat up to 384 lines per gallon bottle. Ideal for use in both wet/dry vacuum systems and amalgam separators.

Sterilization Center Water Solutions

From ensuring high-quality water coming into the steri-center to automatically cooling autoclave wastewater before sending to the drain, our steri-center equipment products provide a comprehensive solution for your water needs. Use the VistaPure™ Water Purification System to produce on-demand high-purity process water for filling sterilizers, dental bottles and more. The self-regulating VistaCool™ Direct-to-Drain Cooling System for Autoclave Wastewater cools and drains autoclave wastewater while significantly increasing workflow efficiency. Additional accessories are available for ease of installation and use.

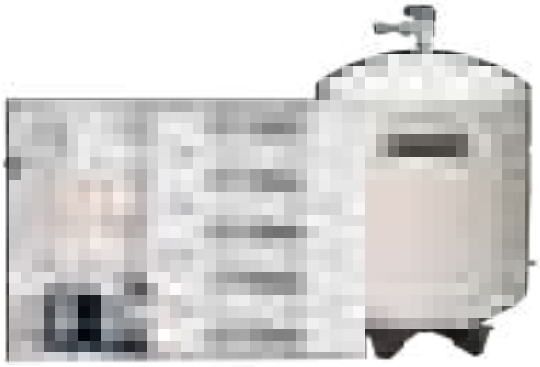

Water Purification

Poor water quality can damage dental instruments inside instrument washers or interfere with proper sterilization. The VistaPure™ Water Purification System eliminates the need to buy bottled water, distilled water or own a distiller with one convenient system.

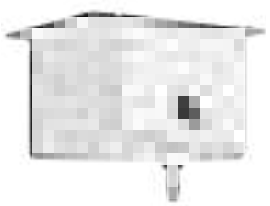

Learn more about our Sterilization Center Water Solutions.

VistaPure™ Water Purification System

VistaPure™ Water Purification System produces two grades of high-purity water for autoclaves, dental bottles, ultrasonic cleaners and the rinse cycle of instrument washers. It connects directly to the city water supply and sends purified water anywhere it's needed in the steri-center for easy, on-demand use. Optional, autofill devices replenish SciCan STAT*IM*® Autoclave and BRAVO™ Autoclave reservoirs automatically, enabling truly hands-free convenience. Optional adapter kit sends high-purity water to instrument washers with final-rinse ports to help protect dental instruments from poor-quality water.

Wastewater Management

The wastewater produced during the process of steam sterilization can often be problematic. Many autoclaves discharge steaming-hot condensation after each sterilization cycle, which is typically collected in a bottle that dental staff members must monitor continuously and empty manually throughout the week. Not only is this process time-consuming and inefficient, but steam and spills from condenser bottles can also damage sterilization center cabinetry.

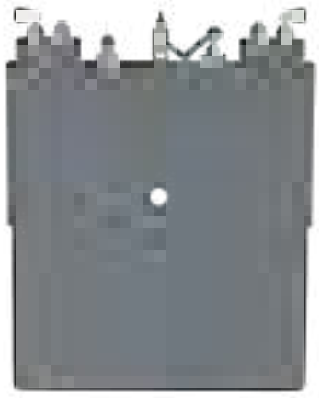

Learn more about our Wastewater Management products.

VistaCool™ Direct-to-Drain Cooling System

The VistaCool™ Direct-to-Drain Cooling System protects drains by preventing autoclave wastewater from melting plumbing. It also protects cabinets by helping to prevent mildew, rot, rust and delamination caused by spills and humid environments created by autoclave condenser bottles. VistaCool™ System saves staff time by eliminating the need to empty steaming-hot water bottles manually.

Nitrous Oxide/ Oxygen Sedation

We provide industry leading solutions by Accutron for nitrous oxide/oxygen sedation. The wide portfolio of products are designed to meet the needs of both the patient and the practice.

For the patient, N_2O/O_2 sedation helps reduce anxiety, makes time pass faster and has some analgesic effects. Plus, it easily clears from the bloodstream after 5 minutes of oxygen. For the practice, the calming benefits of nitrous oxide/oxygen sedation lead to more cooperative patients, a less stressful environment for the staff and potential for increased efficiency. With higher patient satisfaction, less patients canceling and more referrals after a good experience, implementing a nitrous system can provide a valuable additional revenue stream.

The Accutron line includes flowmeters, manifolds, single-use nasal masks, scavenging systems and much more.

Delivery Options

We offer a variety of portable, centralized, and chairside options to best fit your practice's operation and size.

Flexible options for your practice to deliver N_2O/O_2 sedation:

Portable

- Can move between operatories for increased flexibility.
- Occupies less space and no requirement for central storage unit.
- Utilizes E cylinders and is an optimal solution when frequency of administration is low.
- Available in enclosed option to keep cylinders out of sight and make disinfection faster.

Centralized

- Optimal solution when nitrous oxide/oxygen sedation is used frequently.
- Requires central storage area for cylinders and initial investment in gas storage system.
- Utilizes G and H cylinders so more cost-effective over time.

Chairside

- Eliminate long mixed gas and vacuum hoses draping from adjacent cabinets.
- Create uncluttered, safer work zone for doctor and staff.
- Minimize displacement of patient mask caused by drag/pull and weight of long hoses.
- Kits available for a wide variety of dental chair brands.

Accutron™Digital Ultra™ Flowmeters E102

Accutron™Digi-Flo™Automatic Switching Manifold E104

Flowmeters and Manifolds

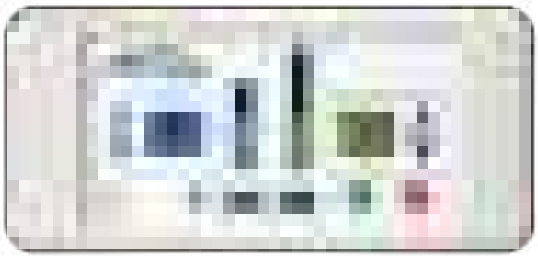

We offer a full line of equipment solutions to implement N_2O/O_2 sedation into your practice - your way. Our Accutron™ Digital Ultra™ Flowmeters are available in both mounted and portable configurations so you can choose what best fits your operatory set up. If a plumbed system is what you want, our Accutron™ Digi-Flo™ Automatic Switching Manifold will seamlessly distribute the gases to your operatories and on to your flowmeter with the proper outlets and hoses.

Accutron™ Digital Ultra™ Flowmeters

The Accutron™ Digital Ultra™ Flowmeters are designed for clinicians who prefer to work in a digital environment but want critical parameters displayed both numerically and as electronic flow tubes. With multiple configurations available to suit the needs of your practice, the Accutron™ Digital Ultra™ Flowmeter also features color-coded, fingertip controls, a sealed flush surface for easy disinfection or barrier protection and a clean, contemporary design.

Accutron™ Digital Ultra™ Flowmeter	
Automatic compensation makes it easy to adjust total flow or gas ratio while the other stays constant. Accutron™ Digital Ultra™ Flowmeters include digital and electronic flowtube displays for ease of use. These flowmeters come with audible and visual alarms to notify of low oxygen, an oxygen fail-safe and flush for additional safety, and emergency oxygen resuscitation connector.

Accutron™ Digi-Flo™ Automatic Switching Manifold

The Accutron™ The Digi-Flo™ Automatic Switching Manifold/Alarm is designed to safely and economically deliver nitrous oxide and oxygen gases to dental operatories. Regulators control the gas line pressure at 50-55 psi, and a pressure relief valve protects the gas lines and equipment against excessive line pressure. In the event of line pressure changes, the alarm system provides audio and visual alerts.

Accutron™ Digi-Flo™ Automatic Switching Manifold includes an automatic cylinder changeover and alarm with audio and visual warnings and is designed to safely and precisely provide uninterrupted gas supply to the dental operatory. A pre-install mounting bracket allows effortless installation while LEDs provide clear and precise numeric line pressure readings.

Nasal Masks

We offer four different types of Nasal Masks, in addition to capnography solutions, so you are sure to find a delivery solution that fits your practice. Since introducing our original Accutron™ Personal Inhaler Plus+™ Mask (PIP+) Nasal Mask design, dentistry has evolved and so have we. Our popular mask-in-mask Accutron™ ClearView™ Nasal Mask design and low profile Accutron™ Axess™ Nasal Mask design provide sleek, comfortable options for patients with helpful features for clinicians, as well. And with the American Dental Association's recommendation for single-use masks, we are the only manufacturer with three different types to choose from.

Accutron™ ClearView™ Nasal Masks

The mask-in-mask design of Accutron™ ClearView™ Nasal Masks minimize ambient nitrous oxide in operatory. The clear outer mask allows visual monitoring of patient's breathing while the soft inner mask creates an improved facial seal. The low profile of ClearView™ Nasal Masks expand clinical field of view. These nasal masks are single-use, minimizing cross-contamination, and are compatible with other scavenging circuits, including Accutron™ PIP+™ Scavenging Circuits.

Capnography Adaptors and Bundles

For measuring patients' end-tidal CO2, our capnography adaptors attach between the nasal mask and scavenging circuit with a female Luer-Lok® port providing a secure connection to the capnography monitor's sample line. Capnography sampling takes place within the nasal mask and directly measures the patient's exhalations at the source. These single-use capnography adaptors connect to either side of the nasal mask for additional flexibility. Sold separately for both Axess™ Nasal Masks and ClearView™ Nasal Masks and Circuits, we also offer bundled options with both adaptors and nasal masks.

Scavenging Circuits

Scavenging is an important part of nitrous oxide/oxygen sedation since it carries the mixed gas to the patient, before being delivered through the nasal mask. Our Scavenging Circuits are sterilizable to meet current safety guidelines, and are available in a variety of configurations to suit your needs.

Learn more about all our Scavenging Circuit products.

Accutron™ ClearView™ Scavenging Circuits

Accutron™ ClearView™ Scavenging Circuits are sterilizable and x-ray compatible. These products meet NIOSH and ADA flow rate recommendations and fit most brands of flowmeters.

Accutron™ ClearView™ Scavenging Circuit II for Standard Bag Tee **43003**

Includes: Scavenging Circuit with Vacuum Control Valve, Corrugated Tube and Reservoir Bag

Accutron™ ClearView™ Scavenging Circuit I for Standard Bag Tee **43005**

Matrx® to ClearView™ Adaptor **35360**

Has spiral, white tubing.

Accutron™ Axess™ Scavenging Circuits

Accutron™ Axess™ Scavenging Circuits are steam-sterilizable, making them an environmentally friendly and cost-effective solution for your practice. These slender, lightweight circuits are more comfortable for patients and allow unobstructed access for clinician. Accutron™ Axess™ Scavenging Circuits minimize drag and pull, so nasal masks stay in place.

Accutron™ Axess™ Scavenging Circuit for In-line Vacuum Controller	**52005**
Includes 6-foot long low profile scavenging circuit with In-line vacuum controller, complimentary low profile nasal mask assortment, adaptors for connecting most non-Accutron vacuum controllers, instructions for use and reprocessing.	
Accutron™ Axess™ Scavenging Circuit for RFS™ (Remote Flow System) and Accu-Vac™ Vacuum Controller	**52006**
Includes 6-foot long low profile scavenging circuit (to be used with RFS and Accu-Vac™ Vacuum Controllers – not provided), complimentary low profile nasal mask assortment, adaptors for connecting most non-Accutron vacuum controllers, instructions for use and reprocessing.	

Accutron™ PIP+™ Scavenging Circuits

Accutron ™ PIP+™ Scavenging Circuits are sterilizable and x-ray compatible. These Scavenging Circuits meet NIOSH and ADA flow rate recommendations.

Lab Transport Bags

Our Lab Transport Bags meet OSHA requirements and recommendation of NCCLS (National Committee for Clinical Laboratory Standards) for transport of medical specimens and/or dental lab cases. Convenient two-pouch system keeps Rx/lab slip separate from specimens/lab case as required by OSHA. The permanent adhesive closure does not contact gloved hands, and they are tamper-evident.

STAYING COMPLIANT
IS MORE CRITICAL THAN EVER.

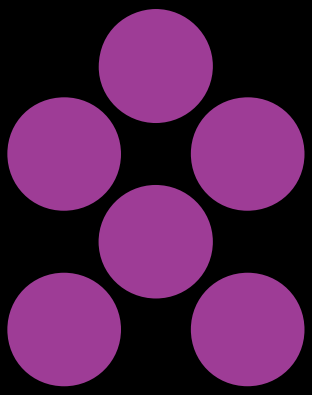

Managing infection prevention standards and guidelines is no easy task. The number of standards and guidelines outlined by organizations like the CDC, state dental boards and OSHA can be overwhelming, and everyone is held to a high level of accountability. To have an effective infection prevention program, staff members must be thoroughly trained and committed to following the right steps every time. Because there is no "good enough" — only compliant or noncompliant.

Change the way you look at infection prevention with the GreenLight Dental Compliance Center by Hu-Friedy. This exclusive, one-of-a-kind resource keeps all of your infection prevention guidelines and regulations conveniently housed in one portal. With GreenLight, you can easily assess, improve, and maintain compliance.

Get started on the path to increased compliance by visiting **GreenLightComplianceCenter.com**

Patient Towels & Bibs

For over 60 years, we have been the benchmark of quality in patient towels, bibs, and liners. Our manufacturing process provides our unique embossing pattern, which allows moisture to flow horizontally across the towel, protecting patients' clothing. Our exclusive reinforced edge embossing design adds strength and durability where towel clips are placed. Our manufacturing process also bonds the layers of tissue securely together, eliminating separation of the layers.

Chain-Free Towels

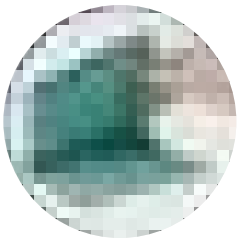

Sani-Tab™ Chain-Free Patient Towels are the only chain-free patient towel with adhesive tabs eliminating the need for bib chains and clips. Sani-Tab™ Towels maximize infection control and patient comfort while saving time and money. Bib stays where placed to maximize coverage.

Evacuation line health risk is real.

Evacuation line backflow potentially impacts one in five patients*. **Now more than ever,** it's critical to protect your patients from any exposure to saliva, blood and other potentially infectious material from previous procedures.

Safe-Flo™ Saliva Ejectors and Valves are unique one-way valves that provide a physical barrier, preventing harmful backflow.

X-Ray Products

X-Ray Barriers and cushions keep equipment protected and patients comfortable during their x-rays.

X-Ray Barriers

Our variety of X-Ray Barriers cover digital sensors and cushions, and come in multiple size options.

Digital Sensor Sleeves

Digital Sensor Sleeves are manufactured from soft polyethylene with smooth seams to eliminate patient discomfort caused by similar sleeves with rough edges.

Surface Disinfectants

According to the CDC, environmental surfaces can become contaminated during patient care and can serve as reservoirs of microbial contamination. Cleaning and disinfecting of environmental surfaces is one of the ways to protects against health-care–associated infections.[1]

Intermediate-Level Disinfectants **G100**

Low-Level Disinfectants **G103**

Intermediate-Level Disinfectants

It is recommended by the CDC to clean and disinfect clinical contact surfaces that are not barrier-protected with an EPA-registered disinfectant after each patient use. Intermediate-level disinfectants should be used when surfaces are visibly contaminated with blood or other potentially infectious materials.[1]
