

The bridge to any Windows practice management program.

Integrates seamlessly with most sensors, image plate systems, intraoral cameras, digital panoramic devices, digital cameras, image scanners and digital video sources.

Dentalmind Imaging simplifies the digital image workflow by using one dental imaging software package.

Dentalmind Imaging.

1-user base install includes the following:

- NameGrabber™ - "Bridge" to any Windows practice management program
- Ability to acquire images from most digital intraoral sensors, digital pan and cephal devices, and phosphor plate scanners
- Image capture from analog* and digital intra-oral and extra-oral cameras
- Scanner support for inputting existing film radiographs
- Patient image management
- Built-in image security and encryption
- Automatic document generation
- Network-capable with optional inexpensive PACsv workstation licenses
- Electronic Manual and Window's Help Documents
- CE marked in class IIa CE 0088
